

FWD CLASS TASKS

- Note: 1. Check “TO-DO” list (if available with each task)
2. Prepare the code that creates an output as shown in the images including “to-do” part of each task
3. Each task is to be submitted in the LMS
-

Task 1: Basic HTML

FWD CLASS TASKS

- Note: 1. Check “TO-DO” list (if available with each task)
2. Prepare the code that creates an output as shown in the images including “to-do” part of each task
3. Each task is to be submitted in the LMS
-

Task 2: Text formatting

HTML Demo Page

A Basic HTML Example

This is a simple webpage demonstrating various HTML elements.

Text Formatting Examples

This is **bold text** and this is *<i>italic text</i>*.

This is <u>underlined text</u>.

This is red text and blue text.

This is **important text** and *emphasized text*.

A beautiful mountain lake.

An HTML Table:

Name	Age	City
John	30	New York
Alice	25	Los Angeles
Bob	35	Chicago

A List Example:

An unordered list:

- Item 1
- Item 2
- Item 3

An ordered list:

1. First item
 2. Second item
 3. Third item
-

FWD CLASS TASKS

- Note: 1. Check “TO-DO” list (if available with each task)
2. Prepare the code that creates an output as shown in the images including “to-do” part of each task
3. Each task is to be submitted in the LMS
-

Task 3: Tables

SNO	ABC	123
abc		cek
abc	cej	ceg
	dfr	cef

Task 4: list and background

Welcome to HTML Practice Webpage

This webpage demonstrates lists, images, tables, and background colors.

1. Text Formatting

Build Text
Bold Text
Underlined Text
Colored Text

2. List of courses

HTML
CSS
JavaScript

2. List of projects

- Basic HTML page
- Basic CSS webpage
- Portfolio website

3. Project phases

- Plan
- Design
- Develop
- Deploy

4. Web design

HTML
Structure of webpage
CSS
Styling of webpage
JavaScript
Behavior of webpage

5. Image Section

... here I have used three images in one table
This is a sample image added using the img tag

6. Table

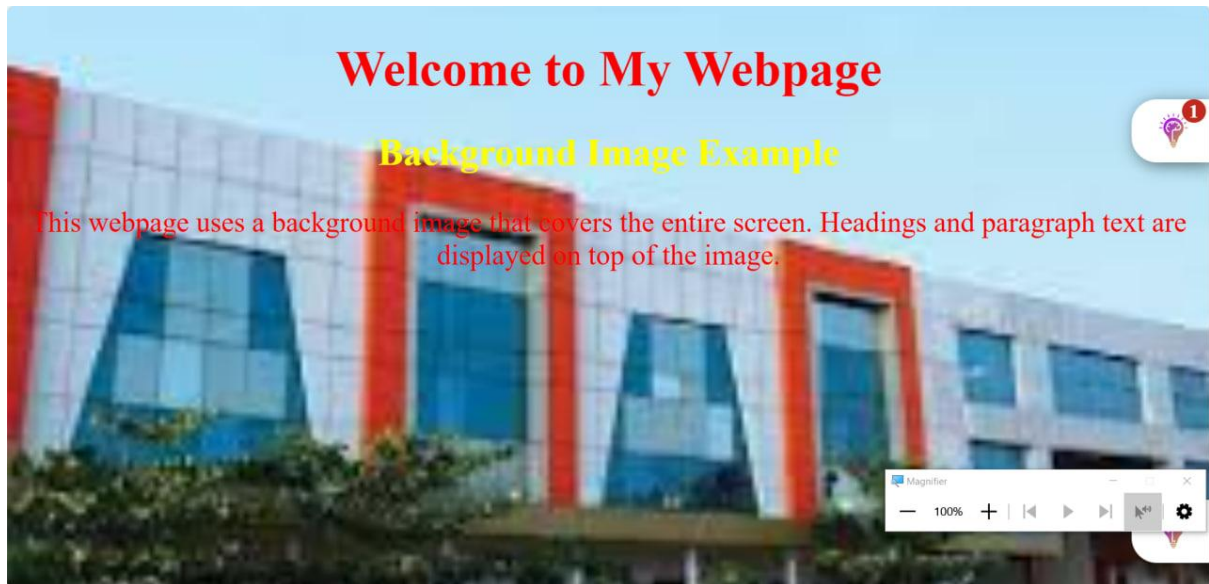

Technology	Purpose
HTML	Structure
CSS	Design
JavaScript	Functionality

End of Webpage Demo

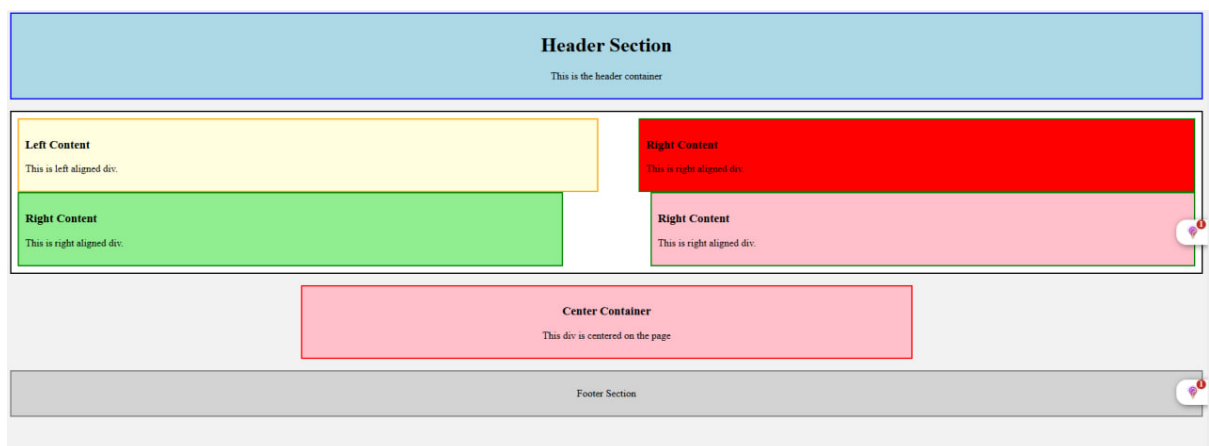

FWD CLASS TASKS

- Note: 1. Check “TO-DO” list (if available with each task)
2. Prepare the code that creates an output as shown in the images including “to-do” part of each task
3. Each task is to be submitted in the LMS
-

Task 5: background image

Task 6: container tags, div and float

FWD CLASS TASKS

- Note: 1. Check “TO-DO” list (if available with each task)
2. Prepare the code that creates an output as shown in the images including “to-do” part of each task
3. Each task is to be submitted in the LMS
-

Task 7: Media controls:

TO do:

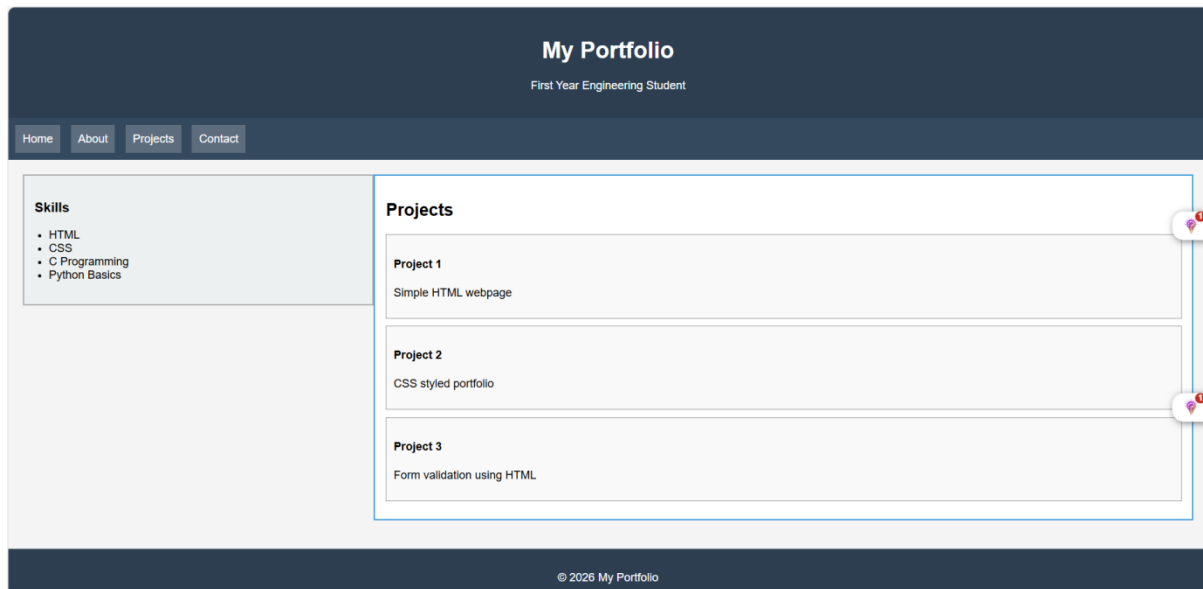

- Add an audio element with controls, autoplay, and loop
- Add a video element with poster, muted, and preload="metadata"
- Test in different browsers

FWD CLASS TASKS

- Note: 1. Check “TO-DO” list (if available with each task)
2. Prepare the code that creates an output as shown in the images including “to-do” part of each task
3. Each task is to be submitted in the LMS
-

Task 8: Basic CSS styling. (Use selectors, lists div & float)

Task 9: CSS Comprehensive layouts:

Display: Block, Inline, Flex & Grid

To Do:

1. All the given output screenshots should be visible inside same webpage. Create different containers for each sections, blocks, flex and grids.
2. Add two more blocks and change the background colour of new blocks to yellow.
3. Add three more inline blocks and adjust the width of new blocks to fit in the same line as previous inline blocks.
4. Add two more flex items and increase the gap between the flex items.
5. Align the flex items to “flex-start”
6. Justify the flex items to “flex-end”
7. Add a new flex container and create 3 flex items vertically inside the container.
8. Make a 3x4 grid. Increase or decrease the gap between grids accordingly.
9. Change the background colour and text colour of new grid items to yellow and black respectively.
10. Apply mixed width to columns and rows of the grid using properties “grid-template columns = 1fr 2fr 2fr 1fr” and grid-template rows=repeat(3,1fr).

FWD CLASS TASKS

- Note: 1. Check “TO-DO” list (if available with each task)
2. Prepare the code that creates an output as shown in the images including “to-do” part of each task
3. Each task is to be submitted in the LMS
-

Chapter: Comprehensive CSS Layouts

For First Year Engineering Students

Block Layout

Block elements take the full width available and stack vertically. They always start on a new line.

display: block

These elements have display: block applied:

```
/* CSS for block elements */ .block-item { display: block; /* Makes element a block */ background-color: #4a90e2; color: white; padding: 15px; margin: 10px 0; /* Vertical margin works */ width: 100%; /* Takes full width by default */ }
```

Default Block Elements: <div>, <h1>-<h6>, <p>, <section>, <article>

FWD CLASS TASKS

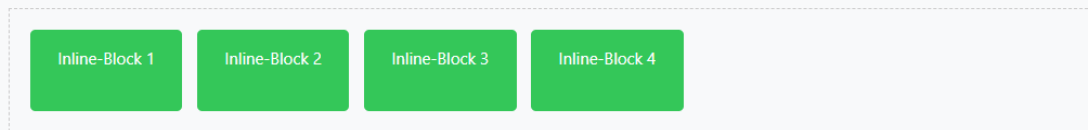

- Note: 1. Check “TO-DO” list (if available with each task)
2. Prepare the code that creates an output as shown in the images including “to-do” part of each task
3. Each task is to be submitted in the LMS
-

Inline-Block Layout

Inline-block elements flow horizontally like inline elements but can have width, height, margin, and padding like block elements.

display: inline-block

These elements have display: inline-block applied:

Inline Elements

This is **inline 1** text with **inline 2** elements that flow **inline 3** horizontally.

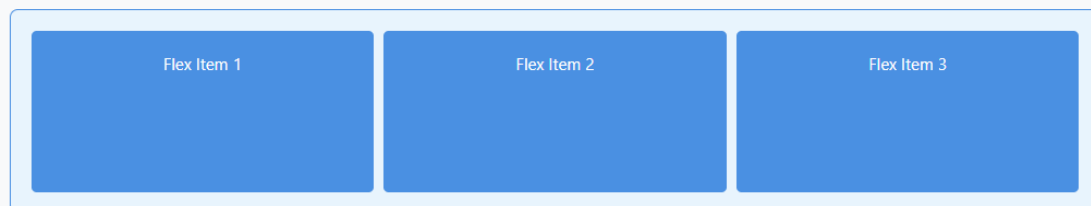

Inline elements ignore width/height and only have left/right margins

Flexbox (Flexible Box Layout)

Flexbox is a one-dimensional layout method for arranging items in rows or columns.

display: flex

This container has display: flex applied:

```
.flex-item { flex: 1; /* Allows items to grow and shrink equally */ justify-content: center; /*other options: flex-start; (Default - items at the start), center; (Items centered along main axis) flex-end; (Items at the end) */ /*space-between; (Space between items) space-around; (Space around items)*/ align-items: center; /*other options: flex-start; (Default - Items aligned at the top), center; (Items centered vertically) flex-end; (Items aligned at the bottom) */ /*stretch; (Items stretch to fill container (default))*/ }
```

FWD CLASS TASKS

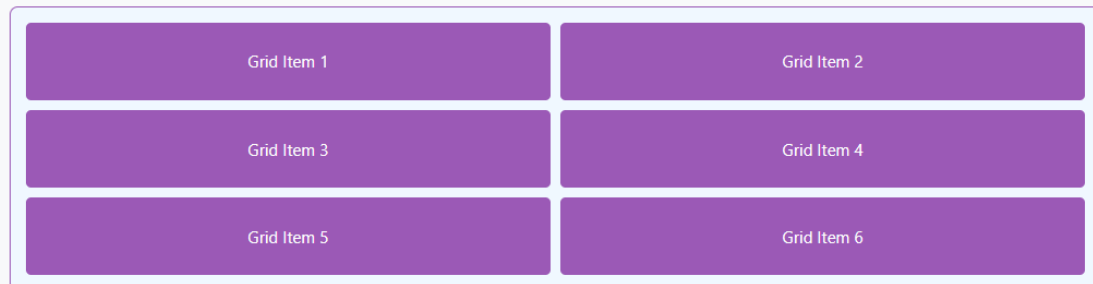

- Note: 1. Check “TO-DO” list (if available with each task)
2. Prepare the code that creates an output as shown in the images including “to-do” part of each task
3. Each task is to be submitted in the LMS
-

CSS Grid Layout

CSS Grid is a two-dimensional layout system for creating complex grid-based designs.

display: grid

This container has display: grid applied:

```
/* CSS for grid container */ /* Different grid-template-columns examples */ .grid-cols-3 { grid-template-columns: repeat(3, 1fr); /* 3 equal columns */ } .grid-cols-fixed { grid-template-columns: 100px 200px 150px; /* Fixed width columns */ } .grid-cols-mixed { grid-template-columns: 1fr 2fr 1fr; /* Mixed ratio columns */ } .grid-cols-responsive { grid-template-columns: repeat(auto-fit, minmax(200px, 1fr)); /* Responsive columns */ }
```

Task 10: Student feedback form:

TO DO:

1. In feedback form: Department must be CSE,ECE, AIDS - drop down
2. Rating must be excellent, good, average, bad- drop down.
3. Add CSS for the styling.
4. After submit the page must be redirected to klh website.

The screenshot shows a web application titled 'College Feedback System'. In the center, there is a 'Feedback Form' with the following fields: 'Name' (text input), 'Email' (text input), 'Department' (dropdown menu), 'Rating' (dropdown menu), and 'Comments' (text area). Below the form are two buttons: 'Submit' and 'Reset'. The footer of the page reads '© 2020 KLH University Hyderabad | Feedback Portal'. There are also two small red notification icons on the right side of the form.
